Your Home Newspaper

The Day goes into more homes in this community on a paid subscription basis than does any other publication – daily, thrice weekly, weekly or monthly.*

Here are the reasons:

The Day gives you the news while it's news - objectively, completely and to the point.

The Day is attuned to its readers, reflecting their interests and their pride in their village.

The Day strives constantly to be a good newspaper - a wholesome and honest one.

The Day is easy to read with its modern makeup, clear type and superior picture reproduction.**

The Day carries more food advertising, and more automotive classified advertising (and does it better***) than any other community paper in the area.

The Day's readers approve of it.

Definition of a credit card:

INSTANT DEBT

A bank charge card is actually a loan from the bank, incurring interest at the rate of 18 per cent minimally per year. This is in addition to the payment provisions for purchases, which are another expensive matter.

Until you pay back the borrowed money according to the bank's requirements, you are incurring this extra service charge for the privilege of doing business "the modern way."

This is a high price to pay for another so-called convenience. We recommend that you figure out how much our save-and-pay-cash plan boosts the dollar value of your income. You'll be amazed.
